Woodworking Display
Middle School/High School
Occupational Related
State Only Contest

Technical Standard

Purpose
The individual display contest is designed to display projects that have been completed during the current school year and to encourage creative involvement and technical competency related to career fields related to architecture and construction. This is not a national level qualifying SkillsUSA contest. Multiple national level contests are offered by SkillsUSA Minnesota and National SkillsUSA for those who are in specific architecture and construction related courses or programs of study.

Rules
Current general SkillsUSA Minnesota rules with respect to SkillsUSA Minnesota activities shall be considered in force.

Scope of the Activity
Projects submitted by an entrant for a contest must be built by that entrant. The following parameters exist:
1. Projects must have a footprint that is small than 4’x8’
2. Materials used to build the project may not exceed $250
3. All entrants will participate in an oral presentation of their project which may include visual aids such as sketches or drawings of the design process, total number of hours spent on the project, dimensions, total material cost, steps taken in the completion of the project, etc.
